CAREER OBJECTIVE

Computer Science and Engineering student with skills in Python, JavaScript, Node.js and MySQL seeking an entry level Software Development Engineer role to apply technical and problem solving skills in developing software solutions.

EDUCATION

B.E. Computer Science and Engineering

2023-2027

Nehru Institute of Technology

CGPA : 8.1

HSC

2023

Indo American School

Percentage: 83.5

SKILLS

Languages: Python, JavaScript , HTML5, CSS3

Backend and Frameworks: Node.js ,Flask

Databases: MYSQL

Tools & Platforms: Git, GitHub, Postman, Render

Computer Fundamentals: Data Structures & Algorithms

PROJECTS

MediPredict Neuro AI

- Engineered a neurological risk assessment platform with role-based access control for patient and doctor dashboards.
- Integrated Google Gemini API to process multimodal medical reports and cognitive assessment data, generating automated health insights.

PDF Automation Tool

- Developed a web based document processing suite utilizing Flask to handle PDF merging, splitting, rotation, and text extraction.
- Implemented efficient file stream buffering and dynamic PDF generation algorithms to process file operations securely.
- Deployed the full-stack application on Render, setting up automated continuous deployment (CD) workflows from GitHub.

CropCare

- Architected an ML-based crop disease classification system using image preprocessing pipelines to analyze plant leaf health.
 - Trained and optimized computer vision models to perform automated disease identification with image validation workflows.
 - Built a responsive web interface enabling farmers to upload leaf images and receive diagnostic predictions.
-

EXPERIENCE

Web Development Intern | Indian Mark

Mar 2026 – May 2026

- Developed responsive frontend interfaces using JavaScript, HTML5, and CSS3 while integrating RESTful APIs via Node.js/Flask to power core application logic.
 - Built robust client-side input validation, error-handling routines, and AI powered functional features to improve application stability and performance.
 - Leveraged Git and GitHub for collaborative version control, participating in code reviews, debugging, and continuous deployment workflows on cloud platforms like Render.
-

CERTIFICATE

Python for Data Science, AI & Development – IBM

Introduction to Front End Development – Meta

Google AI Essentials – Google
